

Marine Biology

What have we been up to?

Images courtesy of Nicolas Jouault, Chris Isaacs, Gareth Jeffreys and Rebecca Kinnear

The July discovery session was held at Portlet and we focused on the West side of the bay. A number of personal firsts were discovered which was great and members were helped to enter finds directly into i-naturalist. Details of the next discovery session can be found at the end of the newsletter.

Some of the species found during the discovery session

Marine Biology

What have we been up to?

The section has kindly been given a collection of natural history texts. These are being made available to section members for a small charitable donation. Please come along to the next members meeting to take a look to see if you can find anything that interests you.

Mediterranean fan worm
La Rocque

Celtic sea slug
La Rocque

San Diego sea squirt

What's next?

Section meetings

Marine Biology Section Meeting

Date: 3rd August
Time: 7.30pm

Location: Société Jersiaise, 7 Pier Road

Marine Biology Section Meeting

Date: 7th September
Time: 7.30pm

Location: Société Jersiaise, 7 Pier Road

Field discovery sessions

Field discovery sessions will take place on a regular basis over the summer.

Come and join us to see what can be found at various locations around the coast of Jersey.
Please sign up via Eventbrite so we have an idea of how many folk to expect, this will enable us to ensure everyone gets the most out of the experience.

If you have them, bring along any field guides and a camera to assist you.
Please wear supportive shoes that you don't mind getting wet, and dress appropriately for the weather. We look forward to seeing you there.

Saturday 19th August

Field discovery session at La Rocque.
We will meet at La Rocque slip, opposite Rue du Pont, at 2.00pm.

Saturday 2nd September

Field discovery session at Archirondel.
We will meet at the cafe car park at 1.30pm.
